# AMARINTH SUPPLIES API 610 VS4 PUMPS FOR THE ADNOC AL MANDOUS OIL STORAGE MEGA FACILITY

Computer generated render showing bespoke base plate design housing the API 610 VS4 pump and Plan 53B seal support system

**Amarinth, a leading company specialising in the design, application and manufacture of centrifugal pumps and associated equipment to the Oil & Gas, petrochemical, LNG, chemical, industrial, power and desalination markets, has supplied four API 610 VS4 pumps to ADNOC for the Al Mandous underground oil storage project.**

ADNOC is building the world's largest underground oil storage facility with a capacity of 42 million barrels of crude oil. The oil storage mega facility in the Emirate of Fujairah, UAE will consist of three underground storage caverns each with a capacity of 14 million barrels, deep below ground level.

Amarinth were selected following the company's successful delivery and continued support of pumps for previous demanding ADNOC projects. The four API 610 11th edition VS4 vertical pumps are 4m long transfer pumps and are supplied with Plan 53B seal support systems.

The pumps are manufactured in D2 super duplex stainless steel to ADNOC specification

The pumps are manufactured in 316 super duplex stainless steel to meet specification, which includes Shell DEP standards. The available footprint for the pumps was limited and so Amarith designed a bespoke baseplate on which to mount the Plan 53B seal support systems which reduced the overall space required.
