Offshore staff

WOODBIDGE, UK – Amarith has delivered condensate pumps to Technical Asia for use on the FPSO Helang, which recently started operating on the Layang field offshore Sarawak, Malaysia.

The order comprised two API 610 OHI pumps with Plan 53B seal support systems, as part of a flash gas compressor package.

The pumps, which will process condensate and oil, are designed to operate at a low NPSH(A) due to space restrictions on the FPSO.
