FEATURED WATER AND WASTEWATER

Amarinth delivers 18m-long pumps for new Indian FPSO

by Editor June 3, 2022

SHARE

Amarinth has completed a US\$1.5 million order from Armada Madura for six API 610 VS4 vertical pumps for a new FPSO being built for India's Oil and Natural Gas Corporation Limited (ONGC).

One of the Amarith 18m long API 610 VS4 pumps for the Armada Madura FPSO in assembly – Image: Amarith.

The 18m long pumps incorporate a supporting system of brackets that Amarith has designed which attaches each pump to its tank during installation ensuring that as the pump is lowered into the tank it remains perfectly aligned, reducing vibration and wear during operation.

Once assembled, the pumps were independently witness tested and certified by DNV at Amarith's facility in Rendlesham, UK. The pumps were then disassembled into 3m segments and shipped to Singapore where the FPSO (floating production storage and offloading unit) is being built.
