

Amarinth is a carbon net zero organisation delivering world-leading expertise in the design, application and manufacture of centrifugal pumps and associated equipment for critical applications in the most arduous and hostile environments.

The company has harnessed the skills, creativity and passion of people who have worked in the pump industry for decades, delivering robust, reliable, sustainable bespoke and short lead time API and ISO pumps, IECEx certified, primarily to the offshore and onshore oil & gas industries; nuclear and renewable energy generation; defence; desalination; process and industrial markets.

Amarinth's portfolio includes:

- **Process pumps** – API 610, API 685, ISO 5199 horizontal, vertical and in-line process pumps, some interchangeable with other OEM pumps.
- **Skid packages and modules** – With a variety of drives for applications including de-sanding, mixing, filtration and chemical injection.
- **Condensate recovery** – Cutting-edge design providing low NPSH and variable speed drives to lower operating costs.
- **Seal support** – Integrated pressurised and vented seal support systems designed to API 682 and ISO 5199, and specific site specifications.
- **Spare parts** – Critical spares for Amarith pumps, and components for other obsolete OEM pumps.
- **Services** – A range of services, including commissioning; strip, report and refurbishment of any pump regardless of manufacturer.

Amarinth operates globally from its base in Rendlesham Suffolk, United Kingdom and offices in the Middle East and Malaysia.
