

**FOR IMMEDIATE RELEASE – 17 October 2018**

**Amarinth secures \$410K order of API 610 pumps from Iraq  
Gates Contracting Company for the Rumaila oil field, Iraq**

**Amarinth, a leading company specialising in the design, application and manufacture of centrifugal pumps and associated equipment to the Oil & Gas, petrochemical, chemical, industrial and power markets, has secured its first order from Iraq Gates Contracting Company for \$410K of API 610 OHI pumps on 22-weeks FCA delivery for the Rumaila oil field, Iraq.**

This first order for Amarith from Iraq Gates Contracting Company (IGCC) of \$410K is for ten API 610 OHI condensate transfer pumps with Plan 11 and Plan 52 double seals and seal support systems. The pumps are destined for the Rumaila oil field, a super-giant oil field located 50km to the west of the city of Basra, southern Iraq. The Rumaila field is estimated to contain 17 billion barrels, the largest oil field ever discovered in Iraq and considered the third largest oil field in the world. It is managed by the Rumaila Operating Organization (ROO), a joint venture between BOC, BP, PetroChina and SOMO.

IGCC approached Amarith for the ten identical API 610 OHI pumps as they were required on an extremely short lead time of 22-weeks Free Carriage Aboard (FCA) from the sea-port in the UK. This is the sort of challenge that Amarith has successfully delivered against many times in the past for Middle East oil and gas companies and will leave Amarith just 20 weeks for the design, manufacture and testing of the pumps and seal support systems, including full documentation and NACE certification for all process wetted parts.

– MORE –

Oliver Brigginsshaw, Managing Director of Amarith, commented: “This latest order from Iraq underlines our on-going commitment and investment in the region and we are delighted that IGCC approached us to supply these pumps recognising that we were the only manufacturer that could deliver bespoke API 610 pumps in the lead time they required. In fact, we are seeing that many of the new projects in the Middle East need API 610 pumps on very short lead times as operators start to increase production again, which Amarith are in a very good position to fulfil.”

**Amarinth API 610 OHI Pump with API Plan 11 Seal System**

**NOTES TO EDITORS:**

Founded in 2002, Amarinth has harnessed the skills, creativity and passion of people who have worked in the pump industry for many years. Amarinth delivers world-leading expertise in the design, application and manufacture of centrifugal pumps and associated equipment to ISO, ANSI & API standards, primarily for the Oil & Gas, petrochemical, chemical, industrial and power markets. The company's portfolio includes:

- **Pumps:** Horizontal and vertical API 610 pumps, chemical and industrial pumps, many of which are interchangeable with the Girdlestone pump ranges, eliminating the need for expensive modifications when replacements are required.
- **Pressure Vessels:** Protect System Plan 52 and 53A and 53B sealant systems with inbuilt condition monitoring for pumps and mixers that are suitable for Safe area up to Zone I.
- **Spares & Service:** High quality, fast lead-time re-engineered spare parts to improve performance and extend pump life, including many which are directly interchangeable with the Girdlestone pump ranges.
- **Packages & Modules:** Condensate Recovery Units manufactured for Spirax Sarco incorporating the innovative Ci-Nergy intelligent variable speed control system, plus bespoke packages & skids built to order.
- **Business Systems:** state-of-the-art e-commerce technologies that deliver 24/7 support enabling customers to select pumps and place orders on-line and then track every stage of manufacture through to delivery, any time, anywhere in the world.

The company operates globally from its base in Rendlesham Suffolk, United Kingdom and has a customer base of world-leading companies, including BP, Shell, ExxonMobil, GlaxoSmithKline, Pfizer, Spirax Sarco, Diageo, AMEC, Fluor and Halliburton.
