

FOR IMMEDIATE RELEASE – 24 May 2023

**Amarinth signs PE Energy as West African agent and
Approved Certified Service Provider**

Amarinth, a world-leading, net-zero designer and manufacturer of low lifecycle cost centrifugal pumps and associated equipment, primarily for the offshore and onshore oil and gas industries; nuclear and renewable energy generation; defence; desalination; process and industrial markets, has signed PE Energy Ltd, based in Nigeria, as a West African agent and Approved Certified Service Provider.

PE Energy Ltd is one of the most trusted and sought-after partners in the West African oil and gas industry with a team of internationally trained experts delivering solutions and application engineering expertise in upstream, midstream, and downstream processes.

Amarinth has developed a strong market presence for its pumps in Africa, spearheaded by its Regional Manager Ejiro Erivona, based in Nigeria. In this agreement, signed between Chris Ryan, Sales Director of Amarith and Daere Akobo, Founder & Group Managing Director of PE Energy, during a visit by PE Energy to Amarith's Head Office in Rendlesham, UK, PE Energy will deliver local marketing and sales support to the West African region and become an Approved Certified Service Provider following a training programme delivered by Amarith.

– MORE –

The new partnership will enable oil and gas organisations in the region to benefit from local expertise and skills in both commissioning and maintaining Amarinth API 610 and API 685 horizontal, vertical and in-line pumps and also when replacing or refurbishing obsolete pumps from other OEMs, particularly where the original pump manufacturer has gone out of business. This will further boost In-Country Value, with oil and gas organisations being able to select high-quality, qualified local suppliers to fulfil these requirements.

PE Energy will leverage Amarinth's proven support in supplying dimensionally and hydraulically interchangeable pumps to replace obsolete OEM pumps with the minimum of disruption to plant, pipework and processes, and provide a range of Amarinth re-engineered spares that use modern computer aided technologies to cost effectively design new components that can not only replace obsolete OEM components, but deliver improved performance and efficiency, and extend the life of an existing pump.

Oliver Briggishaw, Managing Director of Amarinth, commented: "We are delighted to sign this agreement with PE Energy which further expands our presence in the West African oil and gas market and enables us to deliver more local high-quality sales, marketing and maintenance support to organisations operating in this region, whether they require new Amarinth pumps, are looking to cost-effectively replace existing pumps, or seeking refurbishment or spares for other obsolete pumps."

NOTES TO EDITORS:

Amarinth is a carbon net zero organisation delivering world-leading expertise in the design, application and manufacture of centrifugal pumps and associated equipment for critical applications in many of the most arduous and hostile environments around the globe.

Founded in 2002, Amarinth has harnessed the skills, creativity and passion of people who have worked in the pump industry for decades, delivering bespoke API and ISO pumps primarily to the offshore and onshore oil & gas industries; nuclear and renewable energy generation; defence; desalination; process and industrial markets.

The company's innovative approach, business agility and use of sophisticated computer applications enables it to deliver robust, reliable and sustainable pumping solutions on the shortest lead times in the industry.

Amarinth's portfolio includes:

- **Process pumps** – API 610, API 685, ISO 5199 horizontal, vertical and in-line bespoke process pumps, including ones that are hydraulically and dimensionally interchangeable with the former Girdlestone and other obsolete pumps.
- **Skid packages and modules** – Supplied with a variety of drives for applications including de-sanding, mixing, filtration and chemical injection and tailored for the oil & gas, water treatment and power generation industries.
- **Condensate recovery** – Cutting-edge design providing low NPSH up to 98°C with variable speed drives to reduce cycle time and lower operating costs, available in stainless steel, galvanised or copper tanks for light or heavy industrial uses.
- **Seal support** – Integrated pressurised and vented seal support systems designed and delivered to API 682 and ISO 5199 standards and specific site specifications and requirements, working closely with AES, Eagle Burgmann, John Crane and Protect System.
- **Spare parts** – Critical spares for all Amarinth pumps and related components can be dispatched the same day, reducing potential downtime, and in addition components for the former Girdlestone and other obsolete pumps can be re-engineered often improving the performance of existing assets.
- **Services** – A full range of pump related services, delivered from UK head office or on-site globally, onshore or off-shore, including full commissioning and start-up support; also strip, report and refurbishment of any pump regardless of manufacturer.

Amarinth operates globally from its base in Rendlesham Suffolk, United Kingdom and offices in the Middle East and Malaysia with a global customer base, including BP, Shell, ADNOC, NOV, ExxonMobil, Schlumberger, COSCO, EDF, GlaxoSmithKline, Saudi Aramco, Pfizer, Diageo, Kuwait Oil Company, AMEC, Fluor, LUKOIL, Halliburton, and Babcock.
