About Amarithh

Amarinth, a world-leading net-zero designer and manufacturer, specialises in low lifecycle cost API 610, API 685, and ISO 5199 centrifugal pumps and associated equipment for key sectors: offshore and onshore oil & gas, nuclear and renewable energy, defence, desalination, and process and industrial markets.

Our innovative approach, business agility, and advanced computer applications enable us to deliver robust, reliable, and sustainable pumping solutions to the world's largest organisations, for critical applications, in the most arduous and hostile environments around the globe, on the shortest lead times in the industry.

We understand the critical nature of your operations, providing comprehensive spares support for next-day global despatch. Beyond this, our strip, report, and refurbishment service covers both Amarithh and third-party pumps, regardless of the original manufacturer's status, ensuring extended equipment lifespan and minimised downtime.

Choosing Amarithh means developing a partnership beyond conventional support. We offer swift and reliable assistance, contributing to the seamless and uninterrupted functioning of your global operations.

Our Vision

To be the first-choice supplier of high specification pumping solutions, where reliability, efficiency, safety and service are unrivalled.

Our Mission

To provide proactive and personal service of the highest quality to customers worldwide by:

- Working closely with customers and suppliers
- Using our extensive technical knowledge to design, make and project manage innovative solutions
- Challenging, empowering and rewarding our employees

Our Values

These seven core values embrace our culture, spirit and dedication to doing what's right. From the products we sell to how we treat one another, our values guide every decision we make.

- **Unity of purpose** - work seamlessly to meet a common goal
- **Win, win, win** - create innovative solutions where everyone wins
- **Walk the talk** - do what we say, say what we do
- **Respect** - treat others as you would expect to be treated
- **Embrace change** - use initiative and ownership to create new opportunities
- **Feel empowered** - grow, improve and develop yourself and the business
- **Live the Amarithh life** - be enthusiastic, driven and determined

Supporting Specialist Industries

Amarinth works with specialist industries that demand robust, precision-engineered pumps that work reliably in the harshest of conditions. Every project we undertake is bespoke, drawing on our knowledge and expertise to design the ideal solution for your unique requirements, whether it's handling corrosive chemicals or operating in ice-bound seas.

We don't just meet your needs; we anticipate them. Our proactive approach to maintenance ensures that your pumps operate with unparalleled reliability, safety, and efficiency. With Amarith, expect exceptional customer service that keeps your pumps in continuous operation, minimising unplanned downtime and reducing overall lifecycle costs.

We deliver world-leading solutions in the following sectors:

- Oil & Gas
- Industrial
- Chemical
- Power Generation
- Petrochemical
- Pharmaceutical
- Marine
- Healthcare
- Food & Beverages
- LNG
- Desalination
- FPSO
- Renewable Energy
- Nuclear

SUPPORTING A RANGE OF INDUSTRIES

Spares Availability

At our head office, strategic spares are readily available for next-day dispatch, ensuring seamless continuity for your operations. Our commitment to precision guarantees the swift delivery of the necessary parts tailored to your pump's needs, guided by our experienced sales team.

With over two decades of unwavering service, choosing Amarith for a partnership will not only meet but exceed your expectations, delivering excellence at every turn.

- Established and enduring partnerships with trusted sub-suppliers enhances our capability to provide the highest quality components precisely when you need them.
- Our dedication extends beyond mere delivery, upon request our comprehensive service includes thorough inspection, component evaluation, and suggested improvements, ensuring the lasting performance of your equipment.
- Strategically positioned engineers worldwide offer immediate on-site support, tackling challenges head-on, supported by in-house technical expertise, so no query goes unanswered.

RELIABLE, PRECISE & EXPERIENCED

"Justine and Richard really did themselves proud on the weekend to get my team the parts required to turn this pump back around without any hesitation or negativity to the fact I had spoilt their Saturday."

Andrew Guest, British Sugar

Strip, Report & Refurbishment

We skilfully refurbish most API 610, API 685, and ISO 5199 pumps, regardless of the original manufacturer. Our trusted experts offer tailored advice and cost-effective solutions based on your unique needs.

Our meticulous process starts with a pump strip-down and a thorough mechanical and hydraulic assessment. This critical step evaluates the feasibility of refurbishment or suggests a cost-effective replacement. The detailed report becomes the foundation for discussions, ensuring a refurbishment solution aligned with your technical and economic parameters.

Our standard procedure guarantees the replacement of crucial components, with non-replacement items inspected by knowledgeable engineers. Leveraging modern design tools and our pump design engineers' expertise, we often re-engineer components, enhancing reliability and performance.

Each refurbished pump undergoes rigorous testing, certifying it to the same standards as a new pump. This ensures that your pumps will operate reliably for at least another 20 years, supported by our long-term assistance and readily available spares.

Streamlining the process through a dedicated point of contact produces a swift project turnaround, minimising downtime.

Our Strip, Report, and Refurbish service not only delivers an economical solution but also maximises the potential of your existing assets, offering a sustainable choice for your operations.

SKILFUL & KNOWLEDGEABLE EXPERTISE

"Amarinth are always very flexible, negotiable, and attentive to detail. The latest commercial offer was provided within a matter of days. Delivery was carried out on-time without any delays. A worthy industry leading example to follow."

Alex Papayani - Director, Helensville Group LTD

Sustainability

A decade ago, we committed to carbon reduction, evolving into a net-zero organisation. Aligned with some of the world's largest corporations on their net-zero journeys, our sustainability initiatives have achieved recognition:

- ISO 14001 certification highlights our environmental excellence.
- ISO 14064-1 Carbon Reduce Certification underscores our dedication to sustainability.

Alongside our commitment to the timely supply of spares to ensure our pumps continue to operate at optimal efficiency throughout their life, and our Strip, Report and Refurbish service that supports sustainability within our customers operations, our endeavours have yielded many tangible benefits, including:

- Carbon neutrality at our UK head office, powered by our own solar array, with electric and hybrid vehicles recharged, ensuring significant energy savings.
- Direct connection to a local biomass power station enhancing resilience and reducing dependence on the National Grid.
- State-of-the-art test bay offering remote witness testing, minimising travel for customers and officials.
- Our expertise on cutting-edge pumps, among the world's most efficient, is driving new solutions in renewables, hydrogen, and carbon capture.
- Supply chain alignment prioritises environmental philosophies, promoting efficient resource use and inspiring net-zero journeys.

Furthermore, other initiatives include cycle-to-work incentives, a zero-emission car scheme, a wildflower meadow supporting local bees, and robust recycling programs for food, packaging, and waste oil.

In Amarith, you are choosing a partner committed to sustainability and innovation.

Our Spares Team

Amarinth employees are the business's most important asset, and we commit to supporting them in every way possible.

We built our founding philosophy on passion, skill and creativity. We empower and elevate our people so that you get the best team working on your project at every stage, from design, engineering and manufacturing to delivery and commissioning.

With Amarith, you get:

- Skilled and motivated people
- A desire to do things the right way
- Proactive support
- Specialist knowledge
- Internal and external training
- Career progression

"As Amarith's Spares and Service Manager, it is a privilege to speak with customers from various industries and disciplines, to understand our client's needs and to provide them with expertly tailored solutions in a prompt manner. It is this breadth of coverage that my role provides that makes every day exciting."

Justine Rudolph - Spares & Service Manager

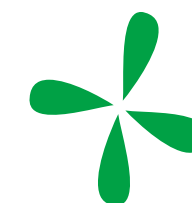

"I support existing and develop new sustainable UK markets in order to aid the growth of Amarith. I hope to continue being involved in UK renewable projects and further increase the UK market."

Richard Barnes - UK Sales Manager
